Without heat, water would fail to develop steam, and without combustion there could be no heat. Without water, combustion and heat would be useless; and in the absence of a Boiler there could be no retention of force, and the energy of these elements could not be successfully applied through this particular machine. With no steam-chest, energy could not be concentrated, and in the absence of special machinery the concentrated energy could not be applied for a definite purpose. Steam is the active agency of this design, and without it no possible action can be established in that machine. To return for a moment to the list of elements. combined and activities involved in the steam engine: The objective list is composed entirely of...
