

## Bulletin Volume 116-119 (Paperback)

By New York State Museum of History

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907 Excerpt: .and at the falls of Wiscoy creek at Wiscoy the floor and walls of the ravine display 135 feet of the middle and upper beds. Near the top of the north walls above the falls the calcareous sandstones occur that succeed this formation and are the lowest of the coarse sandstones with fossils of the Chemung group, referred to by Hall, in the Genesee river section. This band of sandstones comes down to the river level 5 miles south of Wiscoy and i mile south of Fillmore at Long Beards Riffs where it makes a low cascade and is exposed on both sides of the river. It was described and the designation Long Beards Riffs sandstone applied to it by Luther in New York State Museum bulletin 69, 1903. The lower beds of the Wiscoy division are mostly coarse blocky shales or soft sandstones with an...
