

## Standardization of Electrical Practice in Mines

Filesize: 5.12 MB

### ***Reviews***

*It is just one of the best publications. This can be for anyone who states that there was not a well worth reading through. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

## STANDARDIZATION OF ELECTRICAL PRACTICE IN MINES

General Books LLC. Paperback. Book Condition: New. This item is printed on demand. Paperback. 50 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1910. Excerpt: . . . IV. DANGERS OF ELECTRIC WIRES, AND HOW TO AVOID THEM Electric wires used for power purposes in mines are dangerous to human life and should always be approached with caution. Deaths occur every year from electric shock, and yet in most cases these accidents could have been prevented if proper care had been exercised to prevent contact with the wires. Some men accustomed to working near electric wires grow careless, and it is largely because of this carelessness, and a lack of knowledge of the dangers involved, that so many deaths from electric shocks occur. Special precautions are necessary in mines even where low or medium voltages are used. Everybody knows that high-voltage wires, carrying 1000 volts or more, are dangerous, and such wires are carefully avoided. But many think that circuits carrying only a few hundred volts are not dangerous. This is a serious mistake, because many deaths from electric shock occur from pressures of 300 volts or less. A considerable number of deaths have occurred from contact with circuits of less than 200 volts. Electric circuits in mines are, as a rule, more dangerous to life than similar circuits above ground. This is sometimes due to the lack of space, which increases the liability of contact with the wires, but mainly to the damp condition of most mines. In order to receive an electric shock a man must place his body between two conductors of different electric pressures, or between one conductor...
