

# Methods in Mammary Gland Biology and Breast Cancer Research

Filesize: 1.98 MB

## ***Reviews***

*This published book is wonderful. It is really simplified but unexpected situations within the fifty percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

## METHODS IN MAMMARY GLAND BIOLOGY AND BREAST CANCER RESEARCH

[DOWNLOAD](#)

Book Condition: New. Publisher/Verlag: Springer, Berlin | approaches to the experimental problems that still face us in understanding this most fascinating of organs. Too many people contributed to the completion of this volume to allow acknowledgment of all the individual efforts, but we particularly thank the reviewers whose input into the editorial process was invaluable and the authors of these chapters who revised their text, sometimes more than once, to bring it to the high standards set by the Editors. The Committee gratefully acknowledges the support of Vysis, Inc., in the publication of a color figure in Chapter 19, by S. Weber-Hall and Trevor Dale. Finally, we wish to express our heartfelt appreciation to Margot Ip and Bonnie Asch, who worked long and hard to bring this volume to fruition. Margaret C. Neville for the Committee on Mammary Gland Biology Preface One of the most exciting and beneficial developments in research on mammary gland biology and breast cancer has been the influx of increased funding to support this work. This influx, which has been due primarily to the tireless efforts of breast cancer activists to garner additional money from various federal and state sources, has led to a rapid expansion of research efforts by attracting numerous new investigators into the field. These new investigators include students, postdoctoral fellows, and scientists from other fields. | Preface. Section 1: In vivo model systems. 1. Mouse models for mammary cancer; D. Medina. 2. Methods for the induction of mammary carcinogenesis in the rat using either 7,12-dimethylbenz(alpha)anthracene or 1-methyl-1-nitrosourea; H.J. Thompson. 3. A comparison of the salient features of mouse, rat and human mammary tumorigenesis; D. Medina, H.J. Thompson. 4. Xenograft models of human breast cancer cell lines and of the MCF10AT model of human preneoplastic, proliferative breast disease; F.R. Miller,...
