It is used to define the format of the input data so that the proper columns of numbers can be used in calculations. this format column numbers can be entered if they are will not appear within the first 100 rows. The value defaults known, but PINEVOL does have a tool to determine these to the last line in the file, but can be changed by the user. column numbers. The procedure is best explained by a video in the help file. Basically, this tool allows the user to select In fixed-column format, whatever columns might constitute variables in the input file preview, and the first and last tree and plot information can be selected, or even the entire columns as well as the line in the file are displayed immedi-observation can be selected. These data are simply copied to ately beneath the box. Transfer buttons are available...
